Technical Specifications

Elefantaisy (Parade) – 7 Artists

Composition

- 2 pneumatic stilts performers
- 4 four-legged stilts performers (elephants)
- 1 stage manager/pilot
- 1 mobile origami boat, illuminated and equipped with a sound system

Format

- 2 parades of 45 minutes each **or** 1 parade of 1 hour 30 minutes
- Ambulatory performance interspersed with short choreographies

Transport

- **Departure:** Limoges (87000, France)
- **Vehicle:** 1 utility vehicle (1 €/km)

Meals and Accommodation

- **Duration:** From D-1 to D+1
- **Team:** 7 people
- **Accommodation:** 3 twin rooms + 1 single room
- **Meals:** Hot meals

Technical Requirements

Dressing Rooms

- **Area:** Minimum 20 m²
- **Location:** Near the parade starting point
- **Equipment:** Closed, heated (if necessary), with electrical outlets and toilet facilities
- **Supplies:** Water and snacks to be provided by the organizer

Assembly Area

- **Location:** Near the dressing rooms and/or parade start
- **Area:** Minimum 25 m² (5 m x 5 m), ideally covered
- **Equipment:** Electrical outlet for charging the machine's batteries

Stilt Performer Preparation

To prepare the elephant stilt performers, we use two aluminium scaffolding towers, each measuring 2 m in height, 1.5 m in length, and 50 cm in width.

We require an area of approximately 10 m × 5 m, with a minimum ceiling height of 5 m, screened from public view to preserve the magic of the performance and keep this technical preparation out of sight.

Parade

- **Route:**
 - To be communicated in advance by the organizer.
 - On-site reconnaissance upon the team's arrival.
 - Length adapted to the contracted duration.
- **Technical Constraints:**
 - Passage of the machine and elephants (dimensions: H 5 m / L 1.20 m).
 - Maximum height: 4.30 m (legal road height in France, unless otherwise indicated).

- Temporary reduction: Possible to clear obstacles (bridges, trees, gates, etc.), but not suitable for long routes (to be analyzed in advance).
- **Logistics:**
 - Provide a return solution if the parade ends far from the dressing rooms (transport of scaffolding to remove elephant stilts and team return).

Disassembly Area

- **Location:** Near the dressing rooms and/or parade end
- **Area:** Minimum 25 m² (5 m x 5 m), ideally covered

Weather Conditions

- **Wind Sensitivity:** The elephants (large inflatable structures) are limited to 40 km/h wind speed for safety reasons (risk to operators and the public).
- **Above 40 km/h:** Performance adjustments or postponement required.
